

IRIS CARBON[®] is a cloud-based, collaborative and feature-rich filing platform that addresses end-to-end reporting needs of an enterprise. IRIS CARBON[®] is built with deep experience – over 8 years with the US SEC and 12 years globally – and prior experience in compliance reporting. IRIS CARBON[®] simplifies your reporting, while ensuring high quality, increased productivity and efficient collaboration across your organization.

Key Features

Real Time Collaboration

Allows multiple users to collaborate on a document at the same time.

Spreadsheet Linking

Spreadsheet linking allows you to update tables and content directly from your spreadsheet into your document.

Smart Editing

Features like Editing, Review and Comment make finalization process with approvals and sign offs easier.

Roll Forward Filing

Prepare the documentation only once and update it easily for the next filing.

Single Source. Multiple Outputs

Create outputs in multiple formats (including XBRL, EDGAR and PDF) from a single source document.

iXBRL Ready

Carbon is iXBRL ready and can provide you with an iXBRL output at the click of a button.

Integrated Validations

Validate your documents using the integrated validation engine.

Audit Check

Allows external auditors access to company reports, to comment and suggest changes, all in one seamless platform.

Why IRIS CARBON®

Improve Workflow

The document owner can exercise total control by sharing full or part of the document with external parties such as XBRL experts or auditors when required. Since all processes are visible on screen, in one place, work is less prone to errors. It provides a clear, current view of the document from start to finish.

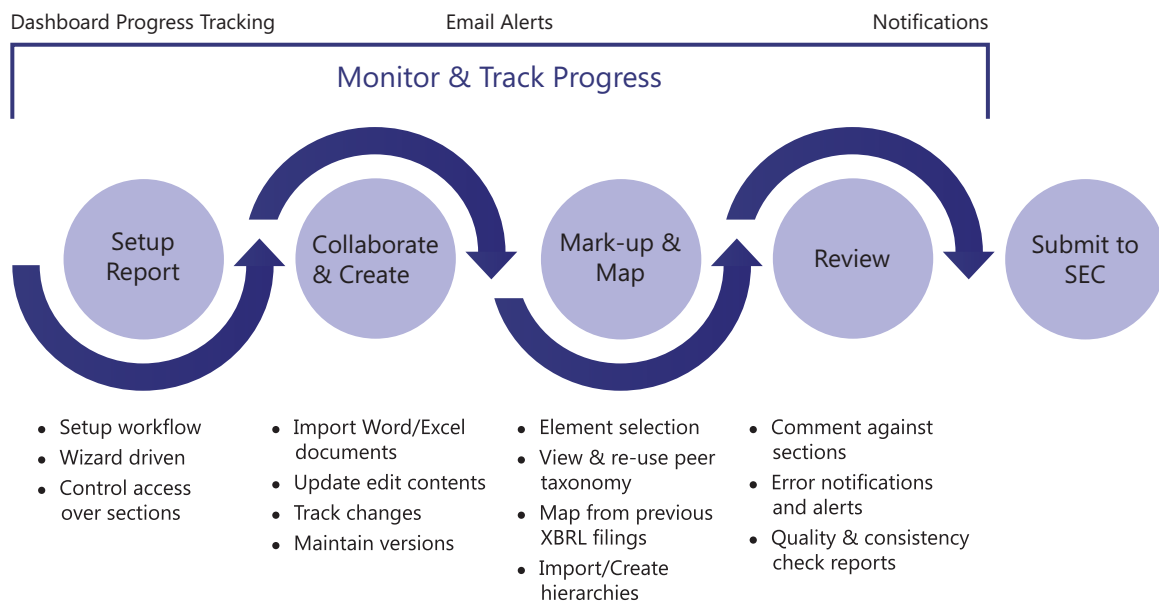

Increase Productivity

IRIS CARBON® is designed not only to make the first creation and submission of documents easier, but is also loaded with features like Roll Forward which facilitate simpler successive filings.

Reliable High-Quality Service

IRIS CARBON® comes with the service backing of a company that has perhaps the largest number of XBRL professionals in the world, their work spread across 15 countries, and a record of working with over 12,000 complex documents in the US and UK alone.

How IRIS CARBON® Works

About IRIS

IRIS Business Services Limited is a global XBRL solutions company with a unique bouquet of technology solutions for creation, management and rendering of XBRL documents. IRIS leverages its vast pool of expertise in the XBRL domain to offer consulting, conversion and taxonomy development services. Over the last 2 decades, IRIS has worked with leading banks, regulators, financial printers, broking firms, mutual funds, information companies and others, in offering solutions which combine information and technology.
