

## About IRIS CARBON®

IRIS CARBON® a cloud-based, collaborative filing platform that helps companies and mutual funds meet their enterprise reporting needs.

Built with over 12 years of experience in various markets, IRIS CARBON® simplifies your reporting, while ensuring high quality, increased productivity and efficient collaboration across your organisation.

IRIS CARBON®, is a quality benchmarked and seamlessly scalable solution for creation of Inline/XBRL documents. The product caters to the regulatory requirement of various markets such as South Africa, USA, UK, Ireland and Italy and handles different taxonomies which includes IFRS, US-GAAP and other country specific taxonomies based on the regulatory reporting requirements.

## Benefits of IRIS CARBON®

**Real time collaboration** - Using the real-time collaboration feature, IRIS CARBON® is being leveraged by teams within client offices as well as IRIS expert teams to track, manage, update and finalise documents in parallel with high efficiency, from creation all the way through filing.

**Increases productivity** - Experience the benefits of auto-tagging for the first year. IRIS CARBON® is designed to not only make the first creation and submission of documents easier, but it is loaded with features like Roll Forward, spreadsheet linking which facilitate simpler successive filings.

**Reliable High-Quality Service** - IRIS CARBON® comes with the service backing of a team that has vast experience of having worked over 20,000 documents across different geographies.

*Technology makes it possible...  
People make it happen*

## Features of IRIS CARBON®

-  **Smart Editing.**  
Features like online Editing, easy version creation and compare, integrated Review and Comment make finalisation process with approvals and signoffs easier.
-  **iXBRL Ready.**  
IRIS CARBON® is iXBRL ready for CIPC's mandate & can provide you with an iXBRL output at a click of a button.
-  **Single Source. Multiple Outputs.**  
Create outputs in multiple formats (including iXBRL, Word & PDF) from a single source document.
-  **Audit Checks.**  
Allows external auditors access to company reports, to comment and suggest changes, all in one seamless platform
-  **Roll Forward Filing.**  
Prepare the documentation only once and update it easily to get your ready template for the next filing.
-  **Spreadsheet Linking.**  
Spreadsheet linking allows you to update tables and content directly from your spreadsheet into your document.
-  **Maker-Checker Approach.**  
We adopt a maker-checker approach for generating iXBRL/XBRL output, which ensures high level of accuracy and have multiple layers of quality check.

## Why IRIS CARBON®?

### Integrated Validations

IRIS's validator used in CIPC's filing portal is also integrated in IRIS CARBON®. Validate your documents using the integrated validation engine.

### Increased Productivity

Our easy workflow allows multiple users to review the document. Features like commenting, version creation and multiple output format generation allow you to create not just inline XBRL but also Word and PDF documents, with all the updated data.

### Hassle Free Support

Real time support available anytime you need.

### Top Notch Quality

IRIS CARBON® comes with the service backing of a company that has perhaps the largest number of XBRL professionals in the world, their work spread across 15 countries, and a record of working with over 20,000 complex documents across different geographies. If you ever experience a challenge, the XDS | IRIS Team can step in at any point and help you through your filing.

## A Strategic & Innovative Partnership between

Trusted by CIPC to implement the XBRL Filing Platform.
